

A Diversified, Long-Term Perspective

Diversified balanced portfolios are invested in fixed income securities and North American and international equities. The objective of balanced mandates is to add value through long-term asset allocation rather than short-term arbitrage. The portfolio's volatility is kept to a minimum by implementing only incremental asset mix changes. The asset mix is a fallout of our bottom-up security selection approach, based on our view of the best risk/return opportunities. Asset allocation is reviewed weekly by the Investment Strategy Committee.

PORTFOLIO CONSTRUCTION

The Fund shall be invested in fixed income and equity securities (including other JF Pooled Funds) using the same investment criteria as the JF Bond and Equity funds in such proportions as may be established from time to time by the Investment Strategy Committee. The Fund's benchmark may therefore change over time.

Asset Mix Ranges:

	Minimum	Current Benchmark	Maximum
Canadian Equities (S&P/TSX)	10%	22%	40%
US Equities (S&P 500)	10%	16%	50%
International Equities (MSCI EAFE Net)	0%	16%	40%
Bonds (FTSE Canada Universe Bond)	30%	38.5%	50%
Cash (FTSE Canada 91-Day T-Bills)	0%	5.0%	20%
Emerging Market Equities (MSCI EM Net)	0%	2.5%	5%

MARKET & ECONOMIC REVIEW

Looking back on 2019, the year started under a dark cloud, with fears that interest rates had risen too far, too fast, and a number of risks needing to be addressed politically, including U.S.-China trade tensions, the USMCA and Brexit, among others. The year finished with movement on all three fronts, as well as lower interest rates in most of the world's major economies, which provided the stimulus for financial markets to generate strong returns for the fourth quarter and for 2019 as a whole.

On the economic front, growth could be characterized as “tepid”, with global real GDP growth tracking at 2.8% – the lowest pace in a decade. The US continues to lead the developed economies by a good margin, and will be helped by progress in trade negotiations with China, although policy uncertainty remains in place with Europe. In Canada, growth is trending at around +1.7% per annum, and there is nothing on the near term horizon that is likely to push that significantly higher. The Bank of Canada has refrained from cutting rates this year, preferring to more carefully assess the balance between external issues and domestic resilience; however, the markets are betting on at least one rate cut in 2020.

The fourth quarter saw very strong equity returns, which took many indexes to all-time highs. Positive catalysts in the quarter included tempering of Brexit uncertainty due to a significant majority in the UK election results, progress on the trade front with a U.S.-China “phase one” deal reached, and ongoing monetary accommodation from key central banks globally. The Canadian market was a relative laggard, although still posted strong gains for the full year. U.S. markets continued to be very strong, and maintained their lead globally. Over the full year, despite a degree of nervousness and uncertainty, equity markets also generated exceptional returns. Bond markets gave a little back in the fourth quarter, with the FTSE Bond Universe falling by -0.9%. However, for the full year the market exceeded expectations significantly, generating a return of 6.9%.

PORTFOLIO REVIEW

The top-line performance of the portfolio was strong during the fourth quarter of 2019, capping off an excellent year. Asset mix was certainly a major contributor, with the overweight in equities, particularly in U.S. and international, contributing significantly. The allocation to international developed markets, as well as the strong excess returns generated in that portfolio were particularly notable over both the quarter and the full year. This, combined with the underweight in bonds, and the strong relative performance of the bond portfolio, led to a top-line return for the quarter that was slightly ahead of the benchmark.

Over the full year, as often happens in periods of strong momentum and equity returns, below-benchmark performance in both the Canadian and U.S. equity portfolios led to overall performance at or around the benchmark level.

INVESTMENT STRATEGY

Market returns came in well ahead of our (and most others') expectations. The overweight allocation to equities was maintained and this was beneficial to both absolute and relative returns, particularly given that our conservative approach frequently makes it difficult to keep up when markets are “on fire”.

It is unlikely that the market will be as generous in 2020. If economies see growth deteriorate, then 2020 is likely to be a challenging year for stocks and a better year for bonds. We see a backdrop where our conservative, quality-focused approach will tend to perform relatively well. In the meantime, we will remain overweight in global equities because we believe that our portfolios are less exposed to the economic cycle than the market as a whole, as well as most of our peers. We are ready, however, to reduce that bias if and when, the fundamentals dictate.

INVESTMENT TEAM

Jarislowsky Fraser has a team-based approach that anchors a culture of collaborative decision-making. The Investment Strategy Committee (ISC), our central risk and investment oversight body, oversees the entire investment process to ensure that investment decisions adhere to the firm's long-standing philosophy and process.
